Holt Cat partners with Southwest ISD to provide paid internships to Southwest High School students

San Antonio – In an exciting and collaborative effort to increase student success, Holt Cat has partnered with Southwest ISD (SWISD) to provide paid internships to Southwest High School students. The internship is part of the district’s Career and Technical Education (CTE) Program, in which students have to apply and interview for the internship positions. This opportunity will allow students to receive technical trade, business, and IT experiences at Holt Cat, while earning high school credit for graduation.

“The Holt/Cat-SWISD partnership promises to be a model for San Antonio and Texas,” said Dr. Lloyd Verstuyft, SWISD Superintendent of Schools. “Students in the twenty-first century crave real world learning opportunities. This student paid intern opportunity will place our students with industry level mentors, provide industry level learning with industry level support. Our SW students are in one of the greatest workforce pipelines ever realized in the city - we thank our friends at Holt/CAT for opening the door and allowing our students this priceless experience.”
